

YOUR ADVANTAGES AND APPLICATION FIELDS

A real alternative to conventional emergency vehicles for boroughs, wayless regions, company premises, hotels, in mining or on off-shore facilities.

The VARIO MFU is a fully adequate add-on kit for installation in various types of vehicle or in buildings. All components are designed for maximum performance and can be operated with 200 to 5000 liters water tanks at choice (depending on the max. vehicle payload).

A special advantage is its maintenance-friendly and easily operated mechanical construction. The modular system also ensures the installation and operation under adverse conditions. High-performance petrol or diesel engines guarantee a worldwide employment.
